

Family and School Groups

AOM offers some additional features to manage the accounts of any underage participants (ages 13 and under). These additional features are strictly for family and school groups.

In addition to the participant report, families and schools can view a list of participants in their groups on screen and edit their passwords and names.

The screenshot displays the 'myReports' interface. On the left is a navigation menu with options: 'participant report', 'challenge report', 'participants' (highlighted), 'add participants', 'log steps', 'dashboard report', and 'aggregate reports'. At the top left, there is a dropdown menu showing 'Ledford Clan'. To the right, under the heading 'Participant List', is a table with the following data:

Note: by using this interface instead of a complete registration, these participants will not be able to complete progress evaluations. Since AOM cannot collect progress information, some data in aggregate reporting for these age ranges will be skewed.

Family and School Groups

Family and school group coordinators can also log steps and convert activities for their group's participants.

Note: logging food items is currently not available in this interface.
