

Additional Notes

AOM is a health and fitness program offerings a variety of tools including an online community. Consult your physician before participating. Information on the website should not replace the relationship with your physician as AOM is not and does not represent a licensed medical care provider and has no expertise in diagnosing, examining, and treating medical conditions.

User Conduct

Conduct of all users will be monitored by other user using the flagging system previously described. AOM retains the right to remove any content that was flagged by other users or that does not adhere to our Privacy Policy and Terms of Use on the footer of the website.

PI Usage

In general, AOM uses your PI to help improve services for all users as well as to study the impact the program has overall on the overweight / obesity epidemic. We do this by combining PI data with non-PI (cookies, browser data, length of visit, etc) and drawing conclusions. PI may also be shared with group administrators to help them manage the group. For additional details on PI usage, please see the Privacy Policy and Terms of Use on the footer of the website.

Deleting Accounts

Due to AOM's mandate to continually evaluate its programs as a research-based non-profit organization, we prefer not to delete users accounts (excepting children under age 13). Your data makes it possible for us to better understand the national overweight / obesity epidemic.
